"Kindness is doing what you can, where you are with what you have."

– Raktivist

PLASTIC SURGERY THROUGH THE AGES

Reconstructive Surgery dates back to ancient Egypt.

The oldest-known procedures appear in an ancient Egyptian medical text called the "Edwin Smith Papyrus," which was thought to be an early trauma surgery textbook.

Plastic Surgery as a discipline derives its name from the Greek word "plastikos" - to mold or give form.

The Faces of War

Skin grafts, bone grafts, facial reconstructions and wound-stitching techniques were used on both military and civilian patients to improve functioning, such as chewing or breathing more easily.

The rise in demand for such procedures was seen during the World Wars.

Today, while body positivity is the newest trend, plastic surgery is still one of the largest and fastest growing industries in the world today. People go after perfection and plastic surgery allows people to achieve that.

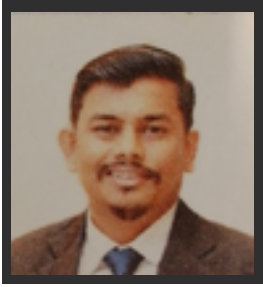

CHRISTMAS POLA

CHRISTMAS CAROLS

Welcome!

DR. ATHILA AMARASIRI
Medical Officer
Medical Services

MS. MINI PRABHAKUMAR
Principal
Nursing Training School

MS. SUPUNIKA SAMARAKODY
Senior Executive - Quality Assurance
Operations Department
